DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Claims 1-24 stand rejected under 35 U.S.C. 102(b) as being anticipated by Laustsen of record for reasons of record.

Response to Arguments

Applicant's arguments filed 4/18/05 have been fully considered but they are not persuasive.

Applicants argue that the Laustsen patent teaches the use of differential pressure as a separating-enhancing means, since it appears in all the examples and in column 5 as quoted.

While the only example does use pressure to further provide separation, the patent does teach with sufficient specificity, that in different embodiments "substantially no different pressure is present" (see col. 5, lines 54-57). In another place the use of pressure is described as, "optionally, not necessarily a differential pressure may be maintained" (see col. 9, lines 43-46).

Applicants further argue that the patent further teaches the use of charged membranes as a means of enhancing separation of the high molecular weight compounds. While the patent does teach the use of charged membranes as a means of enhancing separation, the patent does teach with sufficient specificity that membranes that are not charged are used to separate the high molecular weight compounds (see col. 7, lines 5-30). Further the patent teaches that the units would function with neutrally charged membranes (see col. 9, lines 5-10, see also col. 9, line 67 to col. 10, line 2).

Therefore, the patent does disclose the separation of high molecular weight molecules, wherein substantially all transmembrane migration is by the application of a current, because the patent teaches the use of no pressure in the compartments and non-charged membranes.

The obvious-double patenting rejections have been overcome either by the filing of the terminal disclaimer or the abandoning of the application.

Conclusion

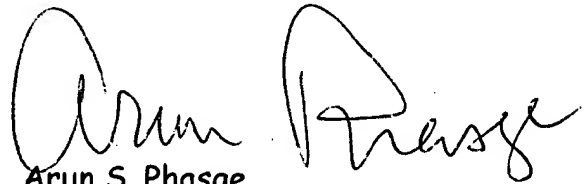

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
